

A message from CEO, Tom Vreeland
March 23, 2026

I am pleased to introduce Pure T. We are a manufacturer of components designed exclusively for the delivery of ultra high purity (UHP) specialty gases. Our range of products extends from the source through to the process tool. We bring product innovation in design and manufacturing based upon our combined expertise learned through many years of industry experience. I am fortunate to be a part of this capable team which includes both old and new friends. I am proud of what we have accomplished so far and what we are bringing to the market.

The founding principles of Pure T are based upon those of my mentor, Rene Zakhour, the grandfather of UHP gas delivery components. He taught me about the business, products, customer service and life in general. We at Pure T will do our best to emulate and build upon his vision for success – make a good, reliable product that performs well backed by outstanding customer service. It seems simple, but few companies are able to fully achieve this recipe, the foundation for the company he built, AP Tech.

We at Pure T look forward to earning our customer's business and building loyalty through our products, customer service and support.
